

~~FSM 10 (C)~~ Addendum  
FSM 10 (C)

Debra ①  
Katz

Continued from  
night before

Realized I had not adequately  
explored ground level - did this as an  
extended RV session following CRV session.

Noticed heavy foliage at ground level.  
Young men - extreme anger not  
realizing what they got themselves into.  
Something came from above + split  
open someones head - Break

Spoke to someone - a male whose  
children + family didn't know what he  
was building. He showed an  
enormous structure made of what  
seems like iron, heavy, looking up at  
it, it casts a shadow - huge  
Has a triangular front and what appears  
to be a series of guns mounted (long  
ones) at the top. These are staggered.  
The word "VIPAR" and "death  
machine" and "death Ray" came  
up.

see sketch on next page

Note: Also had a sense  
of water nearby
